

It glows, it sparkles, it twinkles and shines;  
without it, all's dark, no visible signs  
of colour, beauty, or wonderful sights.  
Have you guessed it yet? I'm talking of light!

Sunlight or candles, light bulbs or torches,  
there are so many different light sources...

But I never knew, at least not 'til now,  
that there is a man who *is* light – oh wow!

A MAN WHO IS  
*light?*

Hang on a minute! That just can't be true!  
People have muscles, bones, teeth and skin too!  
Who can this man be? I so want to know!  
Where did he come from? And did he just glow?
